DETAILS

13-year-old Melinda Creech disappeared in September of 1979. Her mother claimed Mindy had run away and later told her children that Mindy's body was identified in New Jersey.

In 2004, following their mother's death, Mindy's siblings discovered records proving the New Jersey body was not a match to Mindy. An official missing persons report was finally filed, but Mindy's Social Security number has shown zero activity since 1979.
